

Issues - 1

- Copyright notices on CDs
 - raised by Gerry Radack (2000-07-06)
 - addressed by QC N162 - copyright notice is required on *all* documents from WD onwards
 - related issue: SC4 requirement for copyright notice on cover sheet vs ISO CS requirement for copyright notice on page ii

ISO TC184/SC4 QC - Charleston 2000-10-15/20

1

Issues - 2

- ASN.1 Identifiers
 - raised by Greg Paul (2000-07-18)
 - current system as described in ISO 10303-1 and the SDs is (at least) confusing when TCs are applied to multiple editions
 - Example:
 - P42ed1 (1994): version(1)
 - P42ed1 + TC1: version(2)
 - P42ed1 + TC2: version(3)
 - P42ed2 (2000): version(4)
 - P42ed1 + TC3: version(5)
 - P42ed2 + TC1: version(6)

2

Issues - 2 (contd)

- Related issues:
 - relationship between schema identifier and document identifier
 - what constitutes a “change” to a schema:
 - EXPRESS declaration changes only (current approach)
 - changes to definitions of entity data types, etc., where the EXPRESS declaration is not changed
- No consensus from recent email discussions

ISO TC184/SC4 QC - Charleston 2000-10-15/20

3

Issues - 3

- Listing of parts of ISO 10303 in the Foreword
 - raised by Julian Fowler (2000-08-17, first raised 2000-03-20)
 - proposed text is in QC N162 - simplifies approach documented in resolutions to issues on the second edition SDs
 - no objections raised - can we confirm as in QC N162?

4

Issues - 4

- Mapping of subtype/supertypes in an AP ARM
 - raised by Gerry Radack (2000-08-21)
 - submitted as issue USA-MAP-06 in the standing document ballot of Mapping Specification Guidelines, 2nd edition
 - to be discussed at ballot comment resolution workshop (today, 1300-1700)

ISO TC184/SC4 QC - Charleston 2000-10-15/20

5

Issues - 5

- Mapping to a derived attribute in the ARM
 - raised by Gerry Radack (2000-09-22)
 - discussion on QC exploder
 - different cases?
 - DERIVED attributes declared in second edition IRs as “upwardly compatible” addition of new attributes
 - other DERIVED attributes declared in IRs
 - DERIVED attributes defined in AIM/MIM specific subtypes
 - several possible solutions proposed - no consensus as yet
 - treat as a QC issue against SC4 N1029 - seek consensus at this week's workshops on mapping specifications?

ISO TC184/SC4 QC - Charleston 2000-10-15/20

6

Issues - 6

- Checklist issues noted during interval review of ATS324ed2
 - cover sheet requirements/detailed wording
 - variation between title as on cover sheet vs actual title
 - “fax” vs “facsimile” vs “telefacsimile”
 - several minor inconsistencies between checklists and SDs
 - checklists don’t refer to ATS-specific wording defined in the ATS guidelines

ISO TC184/SC4 QC - Charleston 2000-10-15/20

7

Issues - 7

- Action placed on Conveners at the Bordeaux meeting:
 - new policy on test cases
 - “SC4 directs the Conveners and the QC Coordinator to establish an ad hoc task group to develop simple guidelines for the documentation of these test cases, taking into account the existing ATS Guidelines. The ad hoc task group shall distribute the draft test case guidelines before the 2000-10 SC4 meeting and conduct a review meeting at the 2000-10 meeting.”
- Any action taken?
